

Elizabeth Lee

(347) 626-9292 | 139 Valley Road, River Edge NJ 07661 | E.lee7091@gmail.com
LinkedIn: www.linkedin.com/in/elizabeth-lee2018 | **Github:** github.com/dlekward347 |
Portfolio: dlekward347.github.io/PORTFOLIO/

Objective:

Full-Stack Web Developer with a background in financial crimes consultant to enforce anti-money laundering compliance. Known for having an eye for gaps and inconsistencies to debug issues to develop user-friendly applications. Strong wit at applying fundamental concepts for any project no matter the complexity.

Technical Skills

Languages: HTML, CSS, Javascript, React, MySQL, MongoDB, JSON

Applications: Nodejs, Express, Sequelize, Postman, Robo 3T, Handlebars, Bootstrap, Foundation

Projects

Flex Overflow | github.com/dlekward347/Project-2-2020 | pure-temple-84221.herokuapp.com/

- Once logged in, allows users to post questions and answers in a forum-style application. Coding questions, answers, and examples are provided so users can test themselves and prepare for interviews.
- Project Lead - front end: styling and formatting for q&a page, about us page, and project page; back-end: JS scripts for randomizing question with corresponding answers, MySQL seeds file, project wireframe, and api-routes
- Bootstrap, slickjs, Express, Sequelize, Nodejs, MySQL, Passport, Javascript, Cloudinary

Timed Multiple Choice Quiz | <https://github.com/dlekward347/Elizabeth-MCQuiz> |
<https://dlekward347.github.io/Elizabeth-MCQuiz/index.html>

- A timed multiple choice quiz which is enabled by the Start Quiz button, presented with a question, and a timer set at 75 seconds counts down at each question. Seconds deducted if answered incorrectly.
- HTML, CSS, Javascript

Simpli Stocks | https://github.com/black03mach/ticker_query | https://black03mach.github.io/ticker_query/

- An easy-to-use platform for researching a potential investment opportunity's financial data and news stories with the search of a company's ticker.
- Front-end: columns and section formatting, styling; Back-end: storing previously searched tickers in JSON objects, third party api-calls
